

I would personally like to thank the Sales Consultant, System Designer, and Technicians for the professionalism and courtesy that was given to us here at Western Enterprises. We are completely satisfied with or systems upgrade of both facilities and the monitoring services provided. Due to the expertise of your Technicians, during the upgrade, you were able to diagnose our previous system and point out that several areas of our facility had not been effectively monitored in the past.

Your team surpassed the knowledge of our systems and codes and regulations for our upgrades. We appreciate the quality of your work and look forward to a long working relationship with you in the future

**Best Regards,
Danilo Vujovic**
